Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of the first species, or the embodiment of Figure 1, readable on claims 5 through 7 and 11 through 13 in the reply filed on October 26, 2009 is acknowledged.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

3. The drawings were received on July 18, 2005. These drawings are hereby approved.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 5 through 8, 11 through 14, and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There appears to be no proper antecedent basis in the claims for the following limitations in the claims, for example: "channels" [claim 5, line 1]; and, "fluids involved in the heat exchanger" [claim 5, line 7; claim 8, lines 5-6; claim 11, line 6; claim 14, line 5].

Furthermore, the limitation "in the sense of keeping the temperature constant" [claim 8, line 6] is idiomatically improper and it is furthermore not clear what is encompassed by the same, thus further rendering indefinite the metes and bounds of protection sought by the claim.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3744

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

7. As best can be understood in view of the indefiniteness of the claims, claims 5 through 8, 11 through 14, and 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Goodson et al. (US Patent No. 6,942,018 B2, filed January 19, 2002).

Goodson et al. (especially Figures 38 through 40 and columns 30-32) discloses a device and a corresponding method essentially as claimed, including, for example: a micro heat exchanger 50; at least one temperature sensor 250 arranged on an outside surface of the micro heat exchanger 50; and a controller or evaluation unit 500. Goodson et al. furthermore discloses that the input from the various sensors, including the at least one temperature sensor 250, to the controller or evaluation unit 500 is used to diagnose various malfunctions of the micro heat exchanger 50, including the buildup of deposited materials therein (i.e., an obstruction therein).

The reference thus reads on the claims.

Conclusion

Art Unit: 3744

8. The additional prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
